

## Individual Assignment

You are provided with two datasets containing information in a CSV file. The datasets have the following issues:

- 1) Missing values / Empty cells
- 2) Inconsistent date formats
- 3) Duplicate rows.
- 4) Wrong data
- 5) Unnecessary columns that are not relevant to the analysis.

Write pandas scripts to clean these datasets by addressing each of the issues mentioned above.

**Provide the cleaned dataset as the output of your scripts**

**N.B** This question covers multiple common data cleaning tasks and requires a thorough understanding of pandas functionalities to address them effectively.
